Marcos André Gonçalves, Ganesh Panchanathan, Unnikrishnan Ravindranathan, Aaron Krowne, Edward A. Fox, Filip Jagodzinski, Lillian Cassel

May 2003 **Proceedings of the 3rd ACM/IEEE-CS joint conference on Digital libraries**

Full text available:  [pdf \(160.60 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe current efforts and developments building on our proposal for an XML log standard format for digital library (DL) logging analysis and companion tools. Focus is given to the evolution of formats and tools, based on analysis of deployment in several DL systems and testbeds. Recent development of analysis tools also is discussed.

**4** [Asynchronous information space analysis architecture using content and structure-based service brokering](#)

Ke-Thia Yao, In-Young Ko, Ragy Eleish, Robert Neches

June 2000 **Proceedings of the fifth ACM conference on Digital libraries**

Full text available:  [pdf \(470.15 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Our project focuses on rapid formation and utilization of custom collections of information for groups focused on high-paced tasks. Assembling such collections, as well as organizing and analyzing the documents within them, is a complex and sophisticated task. It requires understanding what information management services and tools are provided by the system,

when they appropriate to use, and how those services can be composed together to perform more complex analyses. This paper describes ...

**Keywords:** asynchronous service access, component architecture, content and structure, data-driven brokering, information analysis, information management, metadata

## **5** Linux in Enterprise Network Management

April 1999 **Linux Journal**

## **7** The Arpanet and computer networks

Larry Roberts

January 1986 **Proceedings of the ACM Conference on The history of personal workstations**

Full text available:  [pdf\(736.04 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In 1964 only large mainframe computers existed, each with its own separate set of users. If you were lucky the computer was timeshared, but even then you could not go far away since the terminals were hardwired to it or connected by local phone line. Moreover, if you wanted data from another computer you moved it by tape and you could forget wanting software from a different type of computer. Thus, most users were tied by their computer and terminal to a very restricted environment. < ...

+"server log" +"service log"

## Nothing Found

Your search for **+"server log" +"service log"** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

### Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
